

FALCO PUSH BUTTON

Emergency Door Release

PB-29

IR-30

Remote Control

FALCO Push Button Series

- ✓ Regular wall-mount push to exit buttons.
- ✓ No-touch exit button.
- ✓ Wireless remote control trigger door to unlock.

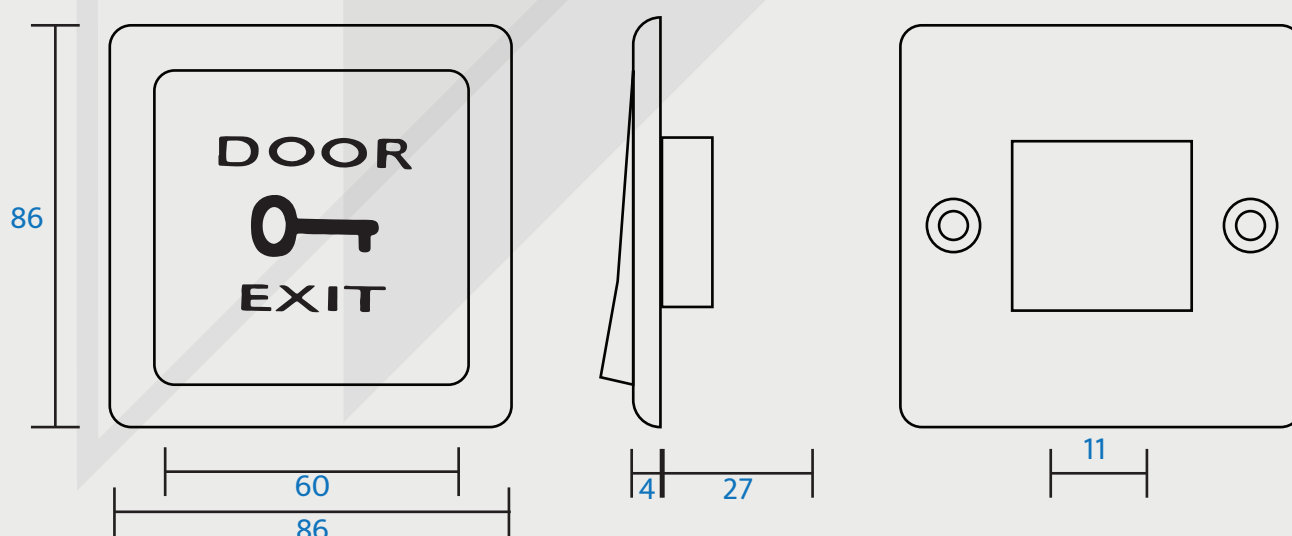

The FALCO Push Button is designed for exit door because there is often no need for credentials when exiting into a less secure place. This request to exit (REx) device allows to open a locked door to exit without needing credentials.

The FALCO Push Button comes in different styles. It can be a normal switch, infrared sensor with LED lights or wireless remote control. Push to exit buttons and motion sensors are the two most common REx devices.
